1. Getting familiar with jQuery:

What you can do with the jQuery?

is used to simplify the client-side scripting of HTML and jQuery also make it easier to navigate document, select DOM elements, create animations, handle events and develop Ajax applications.

How it can help you as web developer?

jQuery allows creation of powerful dynamic web pages and web applications. Allows you to use JSON parsing and Ajax, DOM manipulation based on CSS selectors. You can use events, effects and animations, jQuery promotes brevity and clarity with features like chainable functions and shorthand function names.

If you think our earlier participant list app, in what kind of issues you could use jQuery?

More powerful dynamic, responsive and more clearly, more brevity and more clarity.

What are CDNs? What kind of benefits you get if you use them?

Content delivery network is network of computers, which works together on Internet. CDN caches files for users and CDN can perfect reduce the load time of your pages. „The goal is to distribute service spatially relative to end-users to provide high availability and high performance."
